### **A Driveway Alarm from Driveway alarms.com : An Inexpensive Security Solution**

Driveway alarms.com has a wide range of driveway alarms. A driveway sensor is perfect for monitoring areas around your property and works great in entrances and exits to your property. With a driveway monitor you will be alerted to anyone who approaches your home by the driveway or you may use the driveway alarm as a method to monitor trespassers in your back yard and to protect your valuable assets.

### **The Right Driveway Alarm for Your Needs**

Driveway alarms.com stocks a variety of driveway alarms to suit your needs. We carry a wireless hose driveway alarm that will operate just like the old gas station hose alert - only wireless, several different types of driveway sensors that will detect any motion that moves in front of the sensor and then alert you in your home or business. There are also wired magnetic probes that will the interruption of magnetic field made by a vehicle coming up your driveway . There is even a wireless version of this driveway probe that will transmit up to 2 miles and can have a Walkie talkie accessory to use to monitor anyone who has a larger property. With a driveway alarm from Driveway alarms.com you will never have to worry about being alerted of someone on your property or your driveway.

### **A Driveway Alarm - Your first line of home security**

Our driveway alarms may be used for a variety of different purposes. For the home to know when guests are coming up your driveway. To alert you of someone around your home. To deter trespassers by turning on lights , siren or alarms. For the business to alert you if someone is coming to your business by means of the driveway . Our Model **DWA-5** driveway alarm ,for example, is an excellent tool to have as the portable receiver may be carried with you for instant notification of someone coming up your driveway as well as to provide instant communication between the portable receiver and the base station of the driveway alarm.

**.....NEW LINE OF DRIVEWAY ALARMS COMING SOON!!!!!!**  
**UP TO 3000 FT TRANSMISSION RANGE 4 CHANNEL , FOUR**  
**DIFFERENTS TONES MULTIPLE RELAYS FOR**  
**ACCESSORIES!!!!.....**

## Have you ever wondered how to choose a driveway alarm?

- Here are the questions you need to ask to aid you in your choice of the CORRECT driveway alarm for your specific needs. Only an experienced professional will be able to help you in suggesting which driveway alarm will meet your needs by answering the following questions.
- What is the maximum transmission distance that you will need to meet your needs?
- What type of driveway alarm are you searching for? A hose that a car or other heavy vehicle may run over? A magnetic probe that may be hidden and will only detect metallic vehicles? Or a wireless beam that will detect cars as well as people and animals?
- Are there any trees between the location of the transmitter and receiver? If so are the trees a dense forest or sparse or somewhere in between? The denser the forest the less the transmission distance.
- Are there hills between the location of the transmitter and receiver?
- What is the construction of your home? - Is it a mobile home, does it have aluminum or steel siding, is it constructed of stucco, does it have paper backed insulation or foil insulation?
- Are there transformers nearby - pad mounted or pole mounted may interfere with the transmission/reception of the signal
- Is there an electric fence close by? **Only The Model DWA 5** can be used if this is the case.
- The dealer that can answer these questions are deserving of your business because they CAN ANSWER YOUR QUESTIONS NOW!

Serving the Washington, D.C. Maryland, Virginia, Pennsylvania and West Virginia area since 1991 with door chimes, driveway alarms, security mirrors, fake security cameras, and other security products .

The driveway alarms are available in seven models:

[MODEL DWA-1HOSE MODEL](#)- Will require a car to drive over the hose relaying a [WIRELESS](#) signal to receiver up to 3000 feet away.

[MODEL DWA-2 BEAM MODEL](#)- will project a beam to catch a car or other moving object that crosses its path and will relay a [WIRELESS](#) signal to a receiver up to 3000 feet away .

[MODEL DWA-3 MAGNETIC PROBE](#) - This wired model of our driveway alarms will activate when a motor vehicle drives with in a 14 foot area of the probe. It will then send the signal by wire to the receiver where it will chime similar to a doorbell.

[MODEL DWA-4 WIRELESS MAGNETIC PROBE](#) -This wireless version of our Model DWA-3 driveway alarms will activate when a motor vehicle drives with in a 14 foot area of the probe.

It will then send a wireless signal to the receiver, up to **[3000 FEET](#)** away, where it will chime with a three second high pitched beep.

[MODEL DWA-5](#) : The LATEST addition to our line of driveway alarms. This sensor , when activated will transmit to a handheld receiver and an audible as well as visual notification will be received up to two miles away. Optional base station and multiple hand held receivers will act as a walkie talkie as well. Up to four zones may be monitored.

[MODEL DWA-6](#) - Wireless beam with the latest technology using 430mhz transmission frequency for a maximum transmission distance of 1000 feet.

[MODEL DWA- 7](#) Wireless probes available in a 2000 or 4000 foot configuration utilizing 900 MHZ DIGITAL SPREAD SPECTRUM TECHNOLOGY.

[MODEL DWA-8 NEW!!!](#) Wireless PIR beam that will transmit up to 1500 feet . Many options , low cost \$150.00 for this great system!

[WIRELESS ACCESSORIES](#) - Many accessories ranging from wireless dialers to call you when you are not at home to strobe lights to inform unwanted guests there presence is known.

## DWA-1 ,2,3,4,5 ACCESSORIES

This page contains many wireless security devices that will, when used in conjunction with the driveway alarms advertised on the earlier pages, provide an excellent level of security and deterrence to any unwanted guests.

### **TELEPHONE DIALER WITH ENTRY/EXIT DELAY**

The Dial Alert is a device that you can place in your home or office which will automatically dial up to nine pre-programmed phone or pager numbers of your choice in the event of a problem.

**Features:**

- Can be activated by several different accessory sensors
- Plays a 40 second personalized message for each of the numbers you have programmed
- Entrance and exit delay of up to 75 seconds to allow deactivation
- Battery backup

**PHONE DIALER \$199.95**

The following accessories may be used with the dialer to optimize you security:

### **WIRELESS PIR SENSOR**

This is a wireless passive infrared sensor that will transmit a wireless signal to the telephone dialer whenever an intruder enters an unauthorized area. This unit detects the heat from the person as they move into the area covered. The sensor will cover an area of about 40' by 40'. Several transmitters may be used to monitor different locations. The PIR sensor operates by a 9 volt battery.

**WIRELESS PIR SENSOR \$99.95**

**Reliable Chimes, Inc.**  
**6123 Hot Spring Lane**  
**Fredericksburg, VA 22407**

**Phone: 540-786-8093**

**703-906-9608**

**Toll Free: 800-641-4111**

**Fax: 888-814-7526**

**E-Mail :**  
[sales@reliablechimes.com](mailto:sales@reliablechimes.com)

### **WIRELESS TEMPERATURE SENSOR**

The temperature alert sensor detects a temperature drop or rise. This unit works well when used in conjunction with the dialer to monitor homes, stores, outbuildings, etc when you are away. In the event of a heat rise or loss the sensor will activate the dialer to alert the proper parties. The sensor's range is from -20 degrees to 110 degrees F and may be adjusted to the high and low temperatures you require.

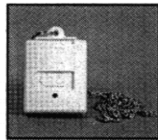

**WIRELESS TEMPERATURE SENSOR \$84.95**

### **WIRELESS DOOR CONTACTS**

The wireless door contacts may be mounted on any door and will activate the dialer when the door is opened. The contacts, which use a 9 volt battery, work well with the dialer because they make full use of entry and exit delay on the dialer.

**DOOR CONTACTS \$44.95**

### **WIRELESS HANDHELD TRANSMITTER**

This small transmitter, which uses a 9 volt battery, can be carried in a pocket or purse. It can activate dialer up to 300 feet away. It may also be used as a panic button to summon for help for those store with limited security that operate late hours, such as convenience stores.

**PANIC BUTTON -\$39.95**

### **SIREN**

The 12 volt DC siren can be plugged into the dialer and will sound when activated. The siren is designed for exterior use and could be used to scare off an intruder. 120 DB

**SIREN \$44.95**

### **TIMER/ LIGHT CONTROL**

The timer control , when activated by our wireless drive alert, is normally used for security reasons. It has the ability to turn on lights, bells, horns, etc that can be set to stay on for 2,5,10 minutes and then will shut off automatically, or you may have the light, etc . turn on until manually reset The control unit has an on/off switch for use your convenience. Installation is very easy- just connect the timer to the dry contacts on the receiver and plug in the light. The timer control can turn on up to 250 watts of light.

**TIMER/LIGHT CONTROL \$44.95**

### **LOUD RINGING BELL**

This 6" bell can be used with any of the driveway alarms. It can be used outside or inside for people with hearing problems. When used in conjunction with the light/timer control it may be programmed to ring up to one hour.

**LOUD BELL \$44.95**

### **LINE CARRIERS**

These are designed to send a remote signal from one building to another, providing that all locations are downstream from one power transformer. Plug the transmitter into a 110 volt outlet in one building, and throughout your existing power lines, it will trip the receiver in another building. The transmitter can be activated by a driveway alarm. A loud bell or light plugged into the receiver would be activated.

### **LINE CARRIER \$84.95**

- Sends signal through AC wiring
- Connects to any of our driveway alarms
- Switches lights, sirens, chimes, etc.
- Flashes lights in the house
- Plug in the line driver and it's ready!
- Use with remote chime, light switch

**LINE DRIVER**

### **LINE DRIVER \$49.95**

#### **Line Receiver Module \$39.95**

- Line driver is required for operation
- Unlimited amount can be used
- Switch lamps or sirens through AC
- 300 watts max. or Heavier Duty: 500 watts
- Easy add-on, just plugs in

### **LINE RECEIVER MODULE \$39.95**

#### **Remote Chime \$39.95**

- Chimes to any room or outbuilding
- Uses existing AC wiring
- Line driver required to run remote chime
- Unlimited number of chimes may be used
- Great for other buildings

### **REMOTE CHIME \$39.95**

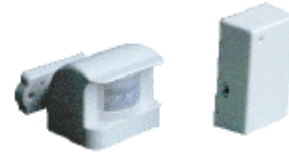

### **STROBE**

This strobe can be used for the hearing impaired as well for use in noisy environments. The amber color is best suited for this purpose. The strobe has a flash rate of 90 flashes per minute.

**STROBE \$49.95**

This Motion-Activated Light Control requires no wiring. It is ideal for chasing away prowlers and intruders as well as improving nighttime convenience and safety. When a dark room or an outside area the sensor is monitoring is approached, a light will go on automatically for a period of five minutes and then shut off. The wireless motion sensor is weather sealed for long life and activates the plug-in receive from up to 100' away, with the signal passing through doors, walls and floors. An override feature allows you to turn lights on and leave them on. Requires 4 AA alkaline batteries, (not included).

**Wireless Motion-Activated Light Control**

- Transmits to 100 feet away
- Turns a light on for five minutes
- Keep prowlers away or you will not have to search for the light switch in the dark.
- Operates independently of driveway alarm

**Wireless Motion-Activated Light Control \$49.95**

When used in conjunction with the Drive-Alert, it will turn on 10 amps of lights, sirens or bells. The unit simply plugs into a 120 VAC outlet and contains its own receptacle to provide power to lights or alarms. The alarm or lights can be adjusted to operate from 1 to 45 minutes. Also available for 12 volt applications.

**Timer**

**Control for DWA-3 24 volt - \$110.00**

## DWA-8

### THE DRIVEWAY OBSERVER (TM ) FROM RODANN ELECTRONICS OF OREGON TO RELIABLE CHIMES®, INC. TO YOUR DOOR

This new model , THE DWA -8 DRIVEWAY OBSERVER (TM) will consist of two components. A transmitter and a receiver.

MADE IN THE USA

<b>DWA-8 TRANSMITTER</b>	<b>DWA-8 RECEIVER</b>

**THE DRIVEWAY OBSERVER ( TM)**

#### **The transmitter :**

A outdoor weather proof transmitter that can be mounted either overhead or to the side . It is powered by a nine volt battery , installed for your convenience and lasting about one year. There are six dipswitches on the inside of the rear cover the will assign ID

Codes by using the first four and the last two will notify you by one of four zones that have been activated by an audible tone. There is also an antennae that can rotate 360 ° for optimal transmission to the volume controlled receiver up to a realistic 1000 feet away ( the Driveway Observer™ has been tested at 1800 feet in laboratory conditions ; we feel that 1000 feet is a closer approximation to what will be realistically achieved). The transmitter will operate at 430 MHZ AM.

**THE RECEIVER:**

The receiver will have a plug-in 12 volt power supply with a 6 foot cord. It may be placed on a tabletop or attached to a wall using the mounting holes on the rear of the DWA-8 receiver. There are also four volume controlled tones to identify each zone. Additionally there is an electronic LED Counter to allow for a vehicle count with this driveway alarm. Should you wish to use any accessories as our strobe , siren , or 12 volt loud bell this may be accomplished by using the 12 volt relay on the rear of the driveway alarm receiver. For optimal reception the antennae will swivel 360 °.

The customer may use additional transmitters and receivers ,if they wish.

DWA-8 DRIVEWAY OBSERVER™ SET ( TRANSMITTER AND RECEIVER) \$150.00

Options listed below.

DWA-8 DRIVEWAY OBSERVER™  
ADDITIONAL TRANSMITTER \$75.00

DWA-8 DRIVEWAY OBSERVER™  
ADDITIONAL RECEIVER \$75.00

**SIREN**

The 12 volt DC siren can be plugged into the dialer and will sound when activated. The siren is designed for exterior use and could be used to scare off an intruder. 120 DB

**SIREN \$44.95**

**LOUD RINGING BELL**

This 6" bell can be used with any of the driveway alarms. It can be used outside or inside for people with hearing problems. When used in conjunction with the light/timer control it may be programmed to ring up to one hour.

**LOUD BELL \$44.95**

**STROBE**

This strobe can be used for the hearing impaired as well for use in noisy environments. The amber color is best suited for this purpose. The strobe has a flash rate of 90 flashes per minute.

**STROBE \$39.95**

*With Reliable Chime's Wireless Probe System, you can install a probe system almost anywhere.* Why would you want to use a battery-operated probe system? Think of our car analogy again. Equate the battery-operated probe to an all terrain vehicle. You've seen the commercials. The four-wheel drive 4 by 4 drives through a creek, up the side of a mountain, over piles of rock and through the desert. The idea conveyed tells you that this vehicle can travel anywhere. The same idea applies to the wireless probe system. There are many instances when a battery-operated system is preferred such as the following:

- 🔍 **Mountainous terrain** where it is difficult to trench
- 🔍 **Extremely firm ground** such as a desert where you would have to work hard to bury a 500' foot wire run
- 🔍 On a ranch where the *nearest building is more than a mile away from* the location where you've buried *the probe*
- 🔍 **Areas that experience severe lightning storms** where a long wire run would act like a huge antennae

For **difficult situations**, the **battery-operated probe** is your **solution**. You do not have to worry about running long wire runs. The only wire is the 22/2 AWG burial cable that attaches the probe to the processor. If you can, this wire should be buried; however, if the location is too difficult, you do not have to bury the probe at all. The system will operate fine.

This alarm is available in two models : A DWA-7-2000 ( 2000 ft. maximum transmission range) & a DWA-7-4000 ( 4000 ft. maximum transmission range). Both systems are available in a dual probe configuration and may be expanded to accept four probes ( each with a different sound by the use of peizo chimes).

If desired, the second probe may be substituted for a relay that will turn off the system for a short time as set by the customer. This is accomplished by means of a transmitter about the size of a garage door transmitter. The cost for this system will be the same as that of the dual probe.

A door bell option is available for use with the probe or may be used with out the probe.

A repeater to extend the range up to four miles is also available at a cost of \$599.95. This option must have an AC power outlet.

Both models are backed by a one year factory warranty.

**PART NUMBER:** DWA-7-2000(Complete Battery-Operated Control Package). System includes an DWA-7-2000 processor, NEMA III weather-resistant plastic box, 2 lithium batteries, a plug-in power supply, a chime mounted on a plastic plate with an on/off switch, 900 MHz Transmitter and Receiver, and a probe with 25 feet of cable.

**DWA-5**

Tuesday, February 27, 2007

DWA-5 MURS ALERT™ probe pictured above

The DWA-5 is available with four options.

PIR sensor with either handheld transmitter or base station.

Wireless Probe with base or handheld transmitter.

This new system will revolutionize the driveway alarm industry.

You may either have a portable receiver that will have 4 zone monitoring or a plug in receiver that will also have the ability to monitor 4 zones. Both receivers are capable of a realistic two mile reception and the plug in receiver has the option of connecting an external antennae to increase the reception distance as well as providing **the perfect solution to those homes that have metal - steel or aluminum siding or a metal roof - in the construction of their home.** If a longer transmission range is necessary or the receiver will not receive in the metal sided building a **marine antennae in the 151-154 MHZ range** may be used on the outside of the building by attaching the cable for the antennae to the base station receiver with BNC connectors. **The same marine antennae may be used on the transmitter by placing the antennae above a hill in a tree for example.**

The transmitter will be powered by 6 "AA" batteries and should last 6-12 months.

The receiver will be powered by 6"AA" batteries and will come with a recharger to recharge the batteries. The receiver will also have a wrist strap and belt clip for easier modes of carrying the

receiver . Receivers may also be used as walkie talkies when on camping trips hiking, biking, or traveling by car so as to not get lost when traveling in a group.

The base station will be powered by AC Current and both base station and receiver will have voice as well as visual notification of zone notification.

As an added feature the handheld receiver will be able to communicate with the base station and with multiple handheld receivers.

This system has a one year warranty.

**Possible use for this system are:**

- Used car dealerships that want to monitor when customers will enter and exit.
- Convenience stores with a small staff that wish to have their employees know when someone drives up for service or when the customer enters the store and the employee has stepped away for a moment.
- Security guards that are on their rounds in a large warehouse or industrial complex will instantly be notified of anyone entering a monitored area to coordinate efforts to arrive at the violated zone
- Large estates or someone that wants the use of a portable receiver to monitor approaches to their home
- Blind spots when exiting their driveway.
- Nurseries with greenhouses that want to keep in touch with employees

OR CALL  
**800-641-4111**

This new 3000 ft transmission driveway alarm is packed with features the competition can only dream of and the best thing is the **PRICE** - much lower and **LONGER TRANSMISSION RANGE**. Read further to see why this will be one of the best new alarms you will find today

The vehicle sensor lets you know any time a vehicle enter or exits your property. The vehicle sensor detects metal and is activated by the movement of a vehicle or any metal object within a 14 foot area of the sensor.

The vehicle sensor probe best operates when buried about 6 inches deep beside or under your driveway. Then position the transmitter in a tree or on a fence post. The actual size of the probe 1 inch by 12 inches and will come with 60 feet of wire. When the probe is activated the transmitter will then send a **wireless** signal to the receiver plugged into a 120 volt outlet in your home , where a 3 second alarm is sounded. The transmitter ( powered by a 9 volt battery also has an internal antennae to prevent it from breaking off) to transmit the signal

**E-Mail :**  
[sales@reliablechimes.com](mailto:sales@reliablechimes.com)

up to 3000 feet and will work at an Operating range: -30°F to 120°F .

To virtually eliminate the possibility interference of a neighbors' driveway alarm interfering there are 256 different security codes Each receiver comes with choice of volume controlled whistle, Westminster Chime, Ding Dong , or Classical tone. The rubber hose drive alert will work with all our optional driveway alarm accessories. Each receiver will have an On/Off Switch , four form "C" relays and a timed output of 4 seconds or 10 minutes for use with accessories.

Multiple transmitters and receivers may be used to monitor different areas. Other accessories may be viewed on the accessories page. This product comes with a one year warranty.

Installation is very simple. No electrician is necessary. A chain saw or lawn edger works well to dig a trench about 3 inches deep to bury the wire or you may rent a gas powered trencher from the local rental center. After digging the trench bury the 3 strand shielded exterior wire ( about 1/4" in diameter).

under your driveway. Then run the wire to the house and connect it to the control unit. The actual size of the probe 1 inch by 15 inches. Plug the control unit into a wall outlet and it will ring like a doorbell when someone drives by the sensor. The driveway bell will ring for about two seconds but may adjusted to ring up to twenty seconds for those who require a longer audible sound.

The basic unit consists of one control unit with one bell as well as one vehicle sensor with 100 feet of wire. Additional wire, bells, and sensor may be added. If you wish additional wire the vehicle sensor will come with the necessary length so that no splicing will be necessary.

Installation is very simple. No electrician is necessary. A chain saw or lawn edger works well to dig a trench about 3 inches deep to bury the wire or you may rent a gas powered trencher from the local rental center. After digging the trench bury the 3 strand shielded exterior wire ( about 1/4" in diameter). Then connect the wire from the vehicle sensor to the control unit and plug the driveway bell into the wall outlet and you are ready.

The control unit is a 24 volt system and can activate our light controls, sirens, telephone tape dialer , etc.

## MODEL DWA-2

			<p>FOR MORE INFO AND TO ORDER <a href="#">CLICK HERE</a></p>
TRANSMITTER	RECEIVER	PORTABLE RECEIVER ( OPTIONAL)	

This new 3000 ft transmission driveway alarm is packed with features the competition can only dream of and the best thing is the **PRICE** - much lower and **LONGER TRANSMISSION RANGE**. Read further to see why this will be one of the best new alarms you will find today

Wireless Motion Alerts are very popular units because they are easy to install and will detect both vehicles and people walking. The radio operated drive alert consists of 2 parts - a transmitter and a receiver with four volume controlled tones. The receiver can be located in your house and plugged into a standard wall outlet.

The weatherproof outside transmitter will have an internal antennae to prevent it from

breaking off. ( Operating range: -30°F to 120°F .) , operated by a 9 volt battery that normally lasts 6 months to 1 year, should be located in the area of your driveway. The transmitter sends out an invisible beam approximately 80 feet. The beam may be pointed in any direction since there is no reflector needed at the end of the beam. If a vehicle or person enters this area, the transmitter, which detects motion will send a radio signal up to 3000' back to the receiver in the house.

To virtually eliminate the possibility interference of a neighbors' driveway alarm interfering there are 256 different security codes

Several Wireless Motion alerts transmitters can be used with the same receiver. For example, you may have 2 driveways entering your place. You can also have extra receivers for additional locations such as a barn or shop.

Each receiver comes with choice of volume controlled [whistle](#), [Westminster Chime](#), [Ding Dong](#) ( will sound twice ) , or [Classical tone](#). The wireless motion drive alert will work with all our optional driveway alarm accessories. Each receiver will have an On/Off Switch , four form "C" relays and a timed output of 4 seconds or 10 minutes for use with accessories.

This product has a one year warranty.

TRANSMITTER

RECEIVER

This new 3000 ft transmission driveway alarm is packed with features the competition can only dream of and the best thing is the **PRICE** - much lower and **LONGER TRANSMISSION RANGE**. Read further to see why this will be one of the best new alarms you will find today

The wireless rubber hose driveway alarm is very popular because it is easy to install. This unit can send a signal up to 3,000' to let you know anytime a vehicle enters or leaves your place. This drive alert consists of 2 parts - a radio operated transmitter with 25' of small 3/8" diameter exterior type rubber hose to lay across your driveway and 1 receiver with whistle attached which can be located in the house and plugged into a standard wall outlet.

The weather proof outside transmitter, which is operated by a 9 volt battery, should be hung on a post or tree next to the driveway. The battery should last about a year before needing replacement. The hose can be replaced should a cut or break occur, but should last many years under normal conditions. Operating range: -30°F to 120°F . To virtually eliminate the possibility interference of a neighbors' driveway alarm interfering there are 256 different security codes

Several rubber hose transmitters can be used with the same receiver. For example, you may have 2 driveways entering your place. You can also have extra receivers for additional locations such as a barn or shop.

Each receiver comes with choice of volume controlled whistle, Westminster Chime, Ding Dong , or Classical tone. The rubber hose drive alert will work with all our optional driveway alarm accessories. Each receiver will have an On/Off Switch , four form "C" relays and a timed output of 4 seconds or 10 minutes for use with accessories

### **A Driveway Alarm from Driveway alarms.com : An Inexpensive Security Solution**

Driveway alarms.com has a wide range of driveway alarms. A driveway sensor is perfect for monitoring areas around your property and works great in entrances and exits to your property. With a driveway monitor you will be alerted to anyone who approaches your home by the driveway or you may use the driveway alarm as a method to monitor trespassers in your back yard and to protect your valuable assets.

### **The Right Driveway Alarm for Your Needs**

Driveway alarms.com stocks a variety of driveway alarms to suit your needs. We carry a wireless hose driveway alarm that will operate just like the old gas station hose alert - only wireless, several different types of driveway sensors that will detect any motion that moves in front of the sensor and then alert you in your home or business. There are also wired magnetic probes that will the interruption of magnetic field made by a vehicle coming up your driveway . There is even a wireless version of this driveway probe that will transmit up to 2 miles and can have a Walkie talkie accessory to use to monitor anyone who has a larger property. With a driveway alarm from Driveway alarms.com you will never have to worry about being alerted of someone on your property or your driveway.

### **A Driveway Alarm - Your first line of home security**

Our driveway alarms may be used for a variety of different purposes. For the home to know when guests are coming up your driveway. To alert you of someone around your home. To deter trespassers by turning on lights , siren or alarms. For the business to alert you if someone is coming to your business by means of the driveway . Our Model **DWA-5** driveway alarm ,for example, is an excellent tool to have as the portable receiver may be carried with you for instant notification of someone coming up your driveway as well as to provide instant communication between the portable receiver and the base station of the driveway alarm.

**.....NEW LINE OF DRIVEWAY ALARMS COMING SOON!!!!!!**  
**UP TO 3000 FT TRANSMISSION RANGE 4 CHANNEL , FOUR**  
**DIFFERENTS TONES MULTIPLE RELAYS FOR**  
**ACCESSORIES!!!!.....**

## Have you ever wondered how to choose a driveway alarm?

- Here are the questions you need to ask to aid you in your choice of the CORRECT driveway alarm for your specific needs. Only an experienced professional will be able to help you in suggesting which driveway alarm will meet your needs by answering the following questions.
- What is the maximum transmission distance that you will need to meet your needs?
- What type of driveway alarm are you searching for? A hose that a car or other heavy vehicle may run over? A magnetic probe that may be hidden and will only detect metallic vehicles? Or a wireless beam that will detect cars as well as people and animals?
- Are there any trees between the location of the transmitter and receiver? If so are the trees a dense forest or sparse or somewhere in between? The denser the forest the less the transmission distance.
- Are there hills between the location of the transmitter and receiver?
- What is the construction of your home? - Is it a mobile home, does it have aluminum or steel siding, is it constructed of stucco, does it have paper backed insulation or foil insulation?
- Are there transformers nearby - pad mounted or pole mounted may interfere with the transmission/reception of the signal
- Is there an electric fence close by? **Only The Model DWA 5** can be used if this is the case.
- The dealer that can answer these questions are deserving of your business because they CAN ANSWER YOUR QUESTIONS NOW!

Serving the Washington, D.C. Maryland, Virginia, Pennsylvania and West Virginia area since 1991 with door chimes, driveway alarms, security mirrors, fake security cameras, and other security products .

The driveway alarms are available in seven models:

[MODEL DWA-1HOSE MODEL](#)- Will require a car to drive over the hose relaying a [WIRELESS](#) signal to receiver up to 3000 feet away.

[MODEL DWA-2 BEAM MODEL](#)- will project a beam to catch a car or other moving object that crosses its path and will relay a [WIRELESS](#) signal to a receiver up to 3000 feet away .

[MODEL DWA-3 MAGNETIC PROBE](#) - This wired model of our driveway alarms will activate when a motor vehicle drives with in a 14 foot area of the probe. It will then send the signal by wire to the receiver where it will chime similar to a doorbell.

[MODEL DWA-4 WIRELESS MAGNETIC PROBE](#) -This wireless version of our Model DWA-3 driveway alarms will activate when a motor vehicle drives with in a 14 foot area of the probe.

It will then send a wireless signal to the receiver, up to **[3000 FEET](#)** away, where it will chime with a three second high pitched beep.

[MODEL DWA-5](#) : The LATEST addition to our line of driveway alarms. This sensor , when activated will transmit to a handheld receiver and an audible as well as visual notification will be received up to two miles away. Optional base station and multiple hand held receivers will act as a walkie talkie as well. Up to four zones may be monitored.

[MODEL DWA-6](#) - Wireless beam with the latest technology using 430mhz transmission frequency for a maximum transmission distance of 1000 feet.

[MODEL DWA- 7](#) Wireless probes available in a 2000 or 4000 foot configuration utilizing 900 MHZ DIGITAL SPREAD SPECTRUM TECHNOLOGY.

[MODEL DWA-8 NEW!!!](#) Wireless PIR beam that will transmit up to 1500 feet . Many options , low cost \$150.00 for this great system!

[WIRELESS ACCESSORIES](#) - Many accessories ranging from wireless dialers to call you when you are not at home to strobe lights to inform unwanted guests there presence is known.

Driveway alarms are becoming a necessary factor in home security as well as to let you know when guests are arriving. There are many accessories from telephone dialers, for added security, to lights and bells to assist you when the alarm is first activated.

WHICH IS BEST FOR YOU?

The driveway alarms are available in seven models:

[MODEL DWA-1HOSE MODEL](#)- Will require a car to drive over the hose relaying a **WIRELESS** signal to receiver up to 1000 feet away.

[MODEL DWA-2 BEAM MODEL](#)- will project a beam to catch a car or other moving object that crosses its path and will relay a **WIRELESS** signal to a receiver up to 1000 feet away .

[MODEL DWA-3 MAGNETIC PROBE](#) - This wired model of our driveway alarms will activate when a motor vehicle drives with in a 14 foot area of the probe. It will then send the signal by wire to the receiver where it will chime similar to a doorbell.

[MODEL DWA-4WIRELESS MAGNETIC PROBE](#) -This wireless version of our Model DWA-3 driveway alarms will activate when a motor vehicle drives with in a 14 foot area of the probe. It will then send a wireless signal to the receiver, up to 1000 feet away, where it will chime.

[MODEL DWA -5](#) - This **new** wireless sensor based system is capable of up to a TWO MILE transmission range. The receiver is available as either a hand held unit or a fixed receiver in the home or business. Both receivers also have the multi zone capability both visually and audibly. This new system will provide functions that no other system can offer.

[MODEL DWA-6](#) - Wireless beam with the latest technology using 430MHZ to transmit up to 1000 feet. Multi zone monitoring and stealth appearance makes this driveway alarm amongst the best available.

[MODEL DWA-7](#) Wireless magnetic probe using 900 MHZ digital spread spectrum technology . Two models to choose from.

[WIRELESS ACCESSORIES](#) - Many accessories ranging from wireless dialers to call you when you are not at home to strobe lights to inform unwanted guests there presence is known.

**LINE DRIVER \$49.95**

**LIGHT SWITCH \$24.95**

Will replace any standard wall switch. Have your porch, driveway, entrance lights turn on automatically when visitors arrive.

**LIGHT SWITCH \$24.95**

**TIMER CONTROL**

**\$69.95**

Connect to the relay on the receiver to extend the on time of lights, horns and sirens to eight minutes. For use [line driver rev.1](#)

**TIMER CONTROL \$69.95**

**LINE DRIVER REV. 1**

**\$59.95**

This line driver , when used in conjunction with the timer control and the lamp module or wall switch will extend the on time of any lights up to eight minutes

**LINE DRIVER REV. 1 \$59.95**

**Line Receiver Module \$39.95**

- Line driver is required for operation
- Unlimited amount can be used
- Switch lamps or sirens through AC
- 300 watts max. or Heavier Duty: 500 watts
- Easy add-on, just plugs in

**LINE RECEIVER MODULE \$39.95**

**Remote Chime \$39.95**

- Chimes to any room or outbuilding
- Uses existing AC wiring
- Line driver required to run remote chime
- Unlimited number of chimes may be used
- Great for other buildings

REMOTE CHIME \$39.95

**External Sirens**

**\$44.95**

- Weatherproof outdoor siren
- Can hard wire or trigger through line driver
- Extra Loud 120db

*OUTDOOR SIREN* \$44.95

**Amber Strobe**

**\$49.95**

This strobe can be used for the hearing impaired as well for use in noisy environments. The amber color is best suited for this purpose. The strobe has a flash rate of 90 flashes per minute.

AMBER STROBE \$49.95

**Loud Plug in siren**

**\$44.95**

- Extra loud 105 DB indoor siren.
- Plug into 120 Volt outlet to use
- Use existing wiring
- Must use with line driver

**LOUD PLUG IN SIREN \$44.95**

**12 Volt Transformer \$39.95**

12 Volt transformer must be used with remote relay to use strobe, bell or siren.

**12 VOLT TRANSFORMER \$39.95**

**Remote Relay \$49.95**

Use with 12 volt transformer to provide power to bell ,siren, or strobe

**REMOTE RELAY \$49.95**

**Siren Kit**

**\$159.95**

- Use the existing wiring in your home or business to activate this siren.
- Great for out buildings and workshops
- Must be on same electrical circuit to use.
- Kit is made up of siren, line driver, 12 Volt transformer, and remote relay.
- If components are purchased separately the cost would be \$189.85

**SIREN KIT \$159.95**

**Strobe Kit**

**\$159.95**

- Use the existing wiring in your home or business to activate this strobe.
- Must be on same electrical circuit to use.
- Kit is made up of strobe, line driver, 12 Volt transformer, and remote relay.
- If components are purchased separately the cost would be \$189.85

**DWA-6 STROBE KIT \$159.95**

This Motion-Activated Light Control requires no wiring. It is ideal for chasing away prowlers and intruders as well as improving nighttime convenience and safety. When a dark room or an outside area the sensor is monitoring is approached, a light will go on automatically for a period of five minutes and then shut off. The wireless motion sensor is weather sealed for long life and activates the plug-in receive from up to 100' away, with the signal passing through doors, walls and floors. An override feature allows you to turn lights on and leave them on. Requires 4 AA alkaline batteries, (not included).

### **Wireless Motion-Activated Light Control**

- **Transmits to 100 feet away**
- **Turns a light on for five minutes**
- **Keep prowlers away or you will not have to search for the light switch in the dark.**
- **Operates independently of driveway alarm**

**Wireless Motion-Activated Light Control \$49.95**

A collapsible driveway security post is a method that may save your car from being stolen. Once installed in your driveway simply lower the post, drive your car to the other side of the post and then raise the post (8 gauge steel) and secure it with a padlock. This will make it almost impossible to steal your car as your car can not Be driven through an iron post .

## DWA-8

### THE DRIVEWAY OBSERVER (TM ) FROM RODANN ELECTRONICS OF OREGON TO RELIABLE CHIMES®, INC. TO YOUR DOOR

This new model , THE DWA -8 DRIVEWAY OBSERVER (TM) will consist of two components. A transmitter and a receiver.

MADE IN THE USA

DWA-8 TRANSMITTER	DWA-8 RECEIVER

**Reliable Chimes, Inc.**  
6123 Hot Spring Lane  
Fredericksburg, VA 22407

**Phone: 540-786-8093**

**Toll Free: 800-641-4111**

**Fax: 888-814-7526**

**E-Mail :**

#### The transmitter :

A outdoor weather proof transmitter that can be mounted either overhead or to the side . It is powered by a nine volt battery ,

installed for your convenience and lasting about one year. There are six dipswitches on the inside of the rear cover the will assign ID Codes by using the first four and the last two will notify you by one of four zones that have been activated by an audible tone. There is also an antennae that can rotate 360 ° for optimal transmission to the volume controlled receiver up to a realistic 1000 feet away ( the Driveway Observer™ has been tested at 1800 feet in laboratory conditions ; we feel that 1000 feet is a closer approximation to what will be realistically achieved).

**THE RECEIVER:**

The receiver will have a plug-in 12 volt power supply with a 6 foot cord. It may be placed on a tabletop or attached to a wall using the mounting holes on the rear of the DWA-8 receiver. There are also four volume controlled tones to identify each zone. Additionally there is an electronic LED Counter to allow for a vehicle count with this driveway alarm. Should you wish to use any accessories as our strobe , siren , or 12 volt loud bell this may be accomplished by using the 12 volt relay on the rear of the driveway alarm receiver. For optimal reception the antennae will swivel 360 °.

The customer may use additional transmitters and receivers ,if they wish.

DWA-8 DRIVEWAY OBSERVER™ SET ( TRANSMITTER AND RECEIVER) \$150.00

Options listed below.

DWA-8 DRIVEWAY OBSERVER™  
ADDITIONAL TRANSMITTER \$75.00

DWA-8 DRIVEWAY OBSERVER™  
ADDITIONAL RECEIVER \$75.00

**SIREN**

The 12 volt DC siren can be plugged into the dialer and will sound when activated. The siren is designed for exterior use and could be used to scare off an intruder. 120 DB

**SIREN \$44.95**

**LOUD RINGING BELL**

This 6" bell can be used with any of the driveway alarms. It can be used outside or inside for people with hearing problems. When used in conjunction with the light/timer control it may be programmed to ring up to one hour.

**LOUD BELL \$44.95**

**STROBE**

This strobe can be used for the hearing impaired as well for use in noisy environments. The amber color is best suited for this purpose. The strobe has a flash rate of 90 flashes per minute.

**STROBE \$39.95**
